## Summary

Software Engineer with 1+ year of experience working with full-stack engineering team to develop enterprise-scale web applications using modern JavaScript frameworks and TypeScript. Experience across frontend development, automated testing, performance validation, and production monitoring in large, distributed systems. Proven collaborator in cross-functional teams, contributing to code quality, system reliability, and stable software releases through testing, observability, and data-driven decision-making.

## Technical Skills

- **Languages & Frameworks:** Java, Python, TypeScript, JavaScript, Angular, HTML, CSS
- **Backend & Databases:** REST APIs, Redis, PostgreSQL, Server-Side Rendering, Express.js
- **Testing & QA:** Playwright, Cypress, E2E testing, Unit Testing, Performance Testing
- **DevOps & CI/CD:** Jenkins, Docker, Kubernetes, Linux, GitHub Actions
- **Monitoring & Observability:** Datadog, Splunk, Grafana
- **AI Tools and Platforms:** GitHub Copilot, Claude code, Google Antigravity, Open code
- **Agile & Collaboration:** Agile / SCRUM, Jira, Confluence

## Experience

### Fidelity Investments

Feb 2025 – Feb 2026

Software Development Engineer (Apprentice)

Bangalore, Karnataka

- Developed and maintained enterprise-scale frontend applications using Angular and TypeScript, following modular, component-based architecture to improve scalability and maintainability.
- Integrated frontend components with RESTful APIs, handled loading/error states, and collaborated with backend teams to ensure reliable data flow and performance.
- Contributed to end-to-end test automation using Playwright, including migrating test suites from Cypress to Playwright to improve test stability and execution speed.
- Executed rush-hour and peak-load performance testing across multiple applications to validate system behavior under high traffic and identify latency bottlenecks.
- Designed, created, and maintained Datadog dashboards across 3 business verticals covering 20+ applications, providing real-time visibility into application and infrastructure health.
- Worked with Jenkins CI/CD pipelines executing automated test suites prior to deployments across development and QA environments.

## Projects

### AI Assistant for Associate Onboarding to Fidelity Brokerage (Fidelity Investments)

- An intelligent onboarding assistant powered by LLMs and Retrieval-Augmented Generation (RAG) architecture.
- Designed to seamlessly guide new associates through business unit domain knowledge, policies, tools, etc. Delivering contextual, real-time answers which will help accelerate productivity.

### DevInsight – Dev Collaboration Platform | [Link](#)

- Built a full-stack real-time collaboration web application enabling synchronized pair-programming, code snippets sharing, and coding challenges using React (TypeScript), Socket.io, and Monaco Editor for a seamless developer experience.

## Education

### Bachelor of Engineering in Electronics and Communication

N.M.A.M Institute of Technology (Visvesvaraya Technological University) | Udupi, Karnataka.

Graduated: June 2023

Relevant Coursework: Object-Oriented Programming in Java, Database Management Systems, Software Engineering Practices, Python Programming, Embedded Linux, Computer Architecture.

## Certifications

AI Foundations Associate: Oracle, Web Development Fundamentals: IBM Skills Build, Introduction to Cloud 101: AWS

## Additional Information

- **AI Hackathon – Fidelity:** Participated in a Fidelity Investments Brokerage AI Hackathon, collaborating with a cross-functional team to develop AI-powered tool to fix accessibility violations in web components.
- **Portfolio Website:** <https://kundanxp.netlify.app/>
- **Soft Skills:** Excellent communication, Adaptability, Collaboration & Teamwork
